Muhammed Niyas

Full-stack web & desktop developer. Open to freelance and full-time roles.

PROFILE

Full-stack developer in Sulthan Bathery, Kerala. I take products from the database to the pixel: React, Next.js and TypeScript up front, Node.js and Supabase behind them, Rust and Tauri when the work has to live on the desktop. I ship client websites and web apps end to end, and I publish open source, like wapi-cloud, a fully-typed SDK for the WhatsApp Cloud API.

CORE STACK

React · TypeScript · Next.js · Supabase · Node.js · Rust / Tauri

SEEN ACROSS MY REPOSITORIES

React · Tailwind CSS · Node.js · Radix UI · Vite · TanStack Query · GSAP · Motion · MongoDB · Next.js · TypeScript · AWS S3

LEARNING

Docker · CI/CD · AWS

SELECTED WORK

wapi-cloud

TypeScript · updated Oct 2026

A promise-based, fully-typed Node.js SDK for the WhatsApp Cloud API. Every call resolves to { data, error }.

TypeScript · tsup · Vitest · Node.js · Next.js · React
https://wapi-cloud-docs.vercel.app/

QRForge

JavaScript · updated Oct 2026

Dynamic QR codes you can re-point without reprinting: create, style and manage them for your business.

Next.js · React · MongoDB · Razorpay · Tailwind CSS · Radix UI
https://qrcodeapp-seven.vercel.app

Taptune

JavaScript · updated Feb 2026

A smart business card platform: NFC sharing, customizable profiles and instant digital connections.

React · Vite · Tailwind CSS · GSAP · Motion · Lenis
https://taptune-frontend-two.vercel.app

Tiba Rent a Car

JavaScript · updated Feb 2026

A car rental platform: REST API, vehicle listings, online booking and Stripe payments.

Express · MongoDB · Stripe · AWS S3 · Node.js · React
https://github.com/niyassby/tiba-backend

Dr. Faheem

JavaScript · updated May 2026

A website for a medical practice, built with React, Vite and Supabase.

React · Vite · Supabase · Tailwind CSS · GSAP · Motion
https://github.com/niyassby/drfaheem
